***Response to Amendment***

1. This Office action is in response to the reply filed on December 27, 2005.

***Response to Arguments***

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Election/Restrictions***

3. Claims 14, 15, 25, 26, 36 through 41, and 45 through 54 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to non-elected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 31, 2003.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1 through 4, 6 through 12, 16 through 23, 27 through 34, and 42 through 44 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakase et al.

Nakase et al. discloses a system and corresponding method for cooling electronic components essentially as claimed, including, for example: a surface or circuit board 148 to which one or more

Art Unit: 3753

electronic components 150 (see Figure 9) are coupled, where the electronic components may include a heat sink 152 mounted thereto; a blower or fan 162 directly mounted to the surface or circuit board 148, with the blower or fan having two ports. The housing 154 is readable on the shroud as recited in the claims and defines an interior cavity sized to receive heat sink 152 therein as shown in Figure 9.

The reference thus reads on the claims.

### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
